EDUCATION

Bachelors of Technology

Year of completion: 2025

Poornima Institute of Engineering and Technology

Artificial Intelligence and Data Science

Experience

Intern

Learn and Build, Rajasthan, India

Jul 2023 - Sep 2023

With a solid understanding of statistics and proficiency in programming language such as Python along with experience in data manipulation using SQL and Pandas.

Intern

Piet AICTE Idea lab, Rajasthan, India

Jul 2022 - Aug 2022

Motivated individual with a keen interest in innovation and technology, excited to contribute to product-based development within the Internet of Things (IoT) sphere

Skills

Programming language:

python,c,c++,java,html,Dart

Library and tools:

Pandas , numpy,matplotlib, Flutter

Software:

SQL server ,Visual studio,android studio

Projects

Web-App on Book Recommendation

Jul 2022 - Aug 2022

Created a user-centric web application dedicated to offering personalized book recommendations. Employed cutting-edge algorithms to analyze individual user tastes, delivering tailored suggestions for an enhanced reading experience.

Attendance Management System

Jul 2022

Developed a robust Attendance Management System using Python, incorporating features for streamlined attendance marking, report generation, and record management. Leveraged Python libraries like SQLite to ensure efficient database handling, facilitating seamless data organization and retrieval.

Sensor network based on IoT

Jul 2022 - Aug 2022

The IOT based sensor network system provides an efficient internet based weather reporting system for users.

Certificate

Database management system by Great learning
